

JNAA Monthly Global Newsletter - 2018-November

Introduction.

Welcome to the November newsletter. This month we highlight an internship opportunity for your students. In the lead up to the launch of our brand new IJAUT, we are offering faculty members the chance to participate in an upcoming IJAUT Bootcamp.

As always, we have various **Open enrollment events** on offer. We encourage your students to take advantage of these sessions for a chance to obtain a free JNCIA-JUNOS certification.

System Engineering Internship Opportunity.

Juniper is looking for several Interns to join us in the Netherlands throughout 2019, with various start dates and durations. Interns will get the opportunity to work as part of our Systems Engineering pre-sales group. The project will vary based on the student's interest and skills and on the length of the internship.

The internship is suitable for a student that has an interest in working hands-on building, testing and automating Network solutions (including cloud and SDN).

For more information email University-Opportunities-EMEA@juniper.net

IJAUT Faculty On-Demand Event

In the lead up to the launch of the brand new IJAUT course, we are offering faculty members a first look at the course as part of an IJAUT On-Demand Event.

The inclusion of this course is a continuation of our mission to impart skills and technologies integral to today's networking industry. We aim to offer your students the knowledge and skills to operate successfully within an ever-evolving networking space. Furthermore, by utilizing our On-Demand system, we have increased the ease of engagement between higher education and Juniper Networks.

Through the IJAUT On-Demand Event, we hope you will see the merits of the course and its value to your students.

Registration links for the event will be sent out in the coming weeks.

Open Enrollment Events

Every month, we have open enrollment learning events for our JNAA students. As the year draws to the close, this will be the last chance for students to gain a JNCIA-JUNOS certification in 2018. Students can sign up by via the advertised link, create an account, and register for the course. In the week prior to the event, they will receive their login details and information about the On-Demand platform. After each event, the students who complete the course requirements will receive a free certification voucher.

Would you like to reserve a private On-Demand Training event? [Let us know!](#)

Date	Content	Location	Country

09/12-15/12	JNCIA-Junos	JNAA On-Demand Boot Camp incl. Labs - Link	Open Event

JNAA Program Updates and Roadmap

We are continuously looking for ways to improve our Academic Program offerings.

As it stands, the following deliverables are set for deployment:

- 2019 H1 - Release of the JNCIS-Cloud On-Demand Training option for JNAA
- 2019 H1 - Release of the JNCIS-DevOps On-Demand Training option for JNAA
